PROFESSIONAL SUMMARY

QA Engineer and SDET with 6 years of experience in manual and automated testing for web, mobile, and API products across logistics, fintech, and fitness technology. Builds end-to-end automation with Playwright, TypeScript, Cypress, Robot Framework, and WebdriverIO, and runs test suites in CI/CD pipelines. Strong in test case design, API testing, SQL, defect analysis, and Agile collaboration, with hands-on experience applying AI (LLM, MCP) to test automation.

TECHNICAL SKILLS

Automation Tools — Playwright, Robot Framework, WebdriverIO, Cypress, Cucumber BDD

Management — TestRail, Allure TestOps, Jira, Confluence

Database & API — SQL, MongoDB, Postman, Swagger, HTTP debugging

Development & DevOps — JavaScript / TypeScript, Python, Go, CI/CD Pipeline, Git

WORK EXPERIENCE

Software Development Engineer in Test (SDET), *Lion Parcel* 02/2025 – 04/2026
Jakarta, Indonesia

- Designed and executed comprehensive test cases covering functional, integration, and end-to-end scenarios to ensure application quality and reliability.
- Collaborated with backend and mobile engineers to triage defects found in staging and production, shortening fix turnaround.
- Performed testing through regression testing and production validation, identifying and reporting defects to ensure stable releases.
- Built E2E test automation (Playwright + TypeScript) with AI MCP (Model Context Protocol) integration for smarter, maintainable test flows.
- Created test automation for Web, API, and Mobile applications using Robot Framework.
- Built custom keywords to handle complex application logic and specific testing prerequisites, ensuring adaptability and efficiency.

Quality Assurance Engineer, *ICHIGO Inc.* 08/2024 – 12/2024
Jakarta, Indonesia

- Performed manual functional and regression testing on Android, iOS, and web applications, including checkout, order, and inventory flows.
- Tested stock and inventory synchronization between the app and Shopify, covering stock updates and product availability.
- Validated Shopify API integration and order-to-stock reconciliation, including error handling for failed syncs.
- Monitored Firebase Crashlytics to triage crashes, prioritize issues by impact, and report them to the development team.
- Validated release candidates on TestFlight and Android internal testing, catching release-blocking issues before production.

Software Development Engineer in Test (SDET), *Moladin* 02/2022 – 08/2024
Jakarta, Indonesia

- Developed and maintained automated API test scripts with WebdriverIO, expanding coverage to 90% of endpoints across core financing flows.
- Automated disbursement and payment API tests covering loan disbursement, repayment, and failed or pending transaction scenarios.

- Validated disbursement status transitions and payment reconciliation, including error handling for failed transfers and timeouts.
- Executed automated and manual tests, analyzed results, and reported defects using test management and bug tracking tools.
- Ran automated test suites in CI/CD pipelines to support continuous integration and faster, safer releases.
- Collaborated with developers, product, and business teams to clarify requirements, reproduce bugs, and verify fixes.

Quality Assurance Engineer, *The FIT Company* 11/2019 – 11/2021
Jakarta, Indonesia

- Partnered with developers and business users to communicate bugs, reproduce issues, and align on expected behavior.
- Built Metabase dashboards to turn raw data into actionable QA and operational insights.
- Investigated and helped resolve operational issues across the application, web dashboard, and database.

Guest Service Officer, *Hotel Monopoli* 10/2017 – 11/2019
Jakarta, Indonesia

- Managed room and rate changes in the property management system and processed reservations from sales offices and travel agents.
- Audited daily facility operations, prepared bills, and maintained accurate guest records using property management software.

Project Enterprise Content Management, *OCBC NISP* 03/2016 – 08/2017
Bekasi, Indonesia

- Administered application environments and applied approved change requests to system functionality.
- Uploaded and validated content and documents in ECM systems against quality and approval standards.
- Supported document and data integration, migration, and delivery activities using ECM tools.

PROJECTS

Redline — AI-Powered Playwright Failure Analyzer , *Go, TypeScript, Playwright, PostgreSQL, LLM*

- Built an open-source failure analysis tool for Playwright API tests that groups failures by root cause (backend bug, test bug, environment issue, or flaky test) across test runs.
- Combined rule-based checks and OpenAPI contract validation with LLM-based AI analysis, automatically redacting sensitive data (JWTs, passwords, tokens) before processing.
- Added automated root-cause verification by re-running failed tests with AI-generated patches, achieving 92–100% accuracy with zero false positives on benchmark suites.

EDUCATION

Bachelor of Computer Information Systems, *Gunadarma University* 09/2011 – 11/2015

- GPA : 3.18

CERTIFICATIONS

- Spec-Driven Development with Kiro (2026)
- Getting Started with Kotlin Programming (2024)
- Getting Started with Python Programming (2026)
- Fundamentals of Cloud and Generative AI on AWS (2026)
- Java Programming Language Fundamentals (2014)
- Learning to Build Android Applications for Beginners (2024)
- J2SE Java Programming Language (2014)

LANGUAGES

- English
- Bahasa Indonesia
